NETWORK OF THE FUTURE 2019

Where Innovators Connect

June 5-6, 2019 - Dallas, Texas

Telecommunications Industry Association

NETWORK OF THE FUTURE

NOF19 // Security and Resiliency

Network of the Future is the annual conference that brings together thought leaders, and professionals from across the Information and Communications Technology (ICT) ecosystem to learn, showcase and share best practices for advancing network communications and next generation technologies.

The evolution of connectivity is transforming the way we live, work and interact. Be at the center of the conversation, helping to define security and resiliency best practices for next generation networks and technologies across the global marketplace.

Network of the Future 2019 focuses on how the ICT industry can collaborate to advance network security and resiliency. As the ICT sector focuses on virtualization, NOF19 will address issues related to supply chain security, infrastructure resiliency, securing the IoT, blockchain, security systems integration, machine learning/AI, and much more.
